AN IMPORTANT DECUSION.

An important decision in reference to the liability of public officers on their official books, has lately been rendered by the Supreme Court in the case of York county vs. John L. Watson. Mr. Watson was Treasurer of York county, and as such had collected large sums of money, which he deposited in the Citizens' Savings Bank. This bank failed and the money was lost. The simple question presented and decided was, Is Watson and his aureties liable for the loss sustained by the failure of the bank? The Circuit Court held that Watson was not liab more of the government would not be lose austained by the failure of the bank? The Circuit Court held that Watson was not liab more of the government would not hose of the government would not his favor. The Supreme Court affirmed the decree and dismissed the appeal.

A few days later Stevens was attacked by acute pains in his right hand and arm, which incapacitated him for any kind of manual labor. Thinking his ailment was rheumatism, he called in the services of a physician, who prescribed the usual remedies, but without success. Stevens's sisters informed the bim that there lived in the city of Augusta a woman doctor, a "female"

on the outskirts of Edgefield, and found there assembled hundreds of negroes engaged in devotional services. He began a general handshaking in pursuance of his medical adviser's suggestions, but no pain struck his arm. He shook hands with some thirty or forty men and women, without feeling the pangs which was to be the detector of his enemy. At last he came upon Andy Mobley and gave him a vigorous shake of the hand, simultaneously with which an acute pain shot through his hand and arm. He had spotted his enemy, and now he must have his blood. He left Mobley, went home and procured a sharp knife, which he concealed in his coat sleeve. Upon reentering the church, he went up the aisle and took a seat upon a long bench next in front of the pulpit. On the other end of this bench sat his enemy, Andy Mobley, devotedly engaged in the religious ceremonies. Stevens waited a few taoments, until the entire congregation were kneeling in prayer, when he cautlously crept behind his unsuspecting victim, and hastily drawing out the knife, made a vigorous strike at his breast. The keen edged blade penetrated the breast and punctured the centre of his heart, causing almost instantane ous death. Without uttering any intelligible word, he sank to the floor. The wildest consternation followed, amid which the assasin fled. Some of the men followed in hot pursuit, and finally captured him a few miles beyond town. He was brought batk here and cast into prison. The negroes were so much enraged that they were with great difficulty

Another Murderer Goes the Hompen Way - Ex-President Grant Expresses his Wrath at Garfield's Treatment of the Stalwarts.

> NEW YORK, May 19. The Herald to-day publishes the following letter from Gen. Grant to Senator Jones of Nevada:

CITY OF MEXICO, April 24, 1831.

My Dear Senator—I see by the latest dispatches received here from the Capital of our country that the deadlock in orof our country that the deadlock in organizing the Senate is not yet broken, and that nothing has been done by the President to allay the bitterness which must be engendered by his most recent appointments. When the first batch of nominations for New York was sent in I was delighted. I believed then that the President had determined to recognize the republican party and not a faction. But his nominations of the next day convinced me that the first act was but a part of a deep laid scheme by somebody to punish prominent leaders for being openly friendly to me. I cannot believe that Gen. Garfield is the author of this policy. I give him credit for being to that Gen. Garfield is the author of this policy. I give him credit for being too big a man to descend to such means for the punishment of men who gave him a hearty support in his election and who are disposed to give him the same support now, for the offence of having had a former preference for some one else for the office which he now holds. But Garfield is President and is responsible Conkling and Platt are the chosen Sena-tors of the great State of New York, and that, too, against all the opposition of an Administration created by the same party that elected them. This should give them all the stronger claim to be consulted in the matter of appointments in their State. When it comes to filling the most influential office in their State without consulting these Senators it is a great slight. When he selects the most offensive man to be found, it becomes an never had his superior, certainly never for moral worth, in the department. It is true Fish resigned, but he did this from a sense of honor, supposing it to be the duty of representatives abroad to give a new Administration the opportunity of saying whether they were wanted or not.

A New Railroad from Columbia to Greenville.

The Greenville Daily News of Sunday last contains the following bit of railroad

Capt. Kirk, chief engineer of the Atlantic and French Broad Railway, passed through the city yesterday en route to Columbia. The following information given by him to a reporter for the Daily News will be read with interest. It is, mays Capt. Kirk, in serious contemplation by influential parties in the State, who have already held a meeting in Columbia with reference thereto to build a bia with reference thereto, to build a road from Columbia to Greenville via road from Columbia to Greenville via Newberry and Laurens, to be extended from Greenville to tap the Atlantic and Broad Railway at some point near the mountains. Crossing the mountains it wii! pass through Haywood county, North Carolina, and pass on through Tennessee to the French Broad riversbout 50 miles from Knoxville. Thence it will branch off, one line extending to Nashville, via Knoxville, the other proceeding in the direction of Cincinnativia Morristown and Cumberland Gap, thus passing through the richest coal and iron region in the United States, as yet only very partially developed. With regard to this great enterprise Capt. Kirk expresses the opinion that the parties concerned in it are men of means and influence and that there is great research to believe its that there is good reason to believe that de-Garfield is President and is responsible cided steps will be taken shortly to carry for all the acts of the Administration. out the programme as here briefly out the programme as here briefly sketched. Greenville, Capt. Kirk is con-fident, can be in direct railroad communication with Augusta in less than eighteen months—probably in twelve—the distance, via Belton, being 113 miles. Work is being pushed on rapidly on the Atlan-tic and French Broad railway and the prospects of this enterprise are very encouraging.

# DANIEL PRATT GIN COMPANY GIN, FEEDER and CONDENSER

THIS is the 50th year of the Daniel Pratt Cotton Gin Business, during which time they have manufactured over 22,000 Gins, which are used in every cotton-growing State in the Union, in Mexico, South America, British East Indies, and in almost every other

In the Union, in Mexico, South America, British East Indies, and in almost every other in the Union, in Mexico, South America, British East Indies, and in almost every other country where cotton is grown.

The Revolving Head placed in the end of the cotton-box prevent the Gin from choking and the roll from breaking. Any common plantation hand being able to feed the Gin satisfactorily. The Feeder is superior to any other machine of the kind in use. They are simple in construction, and easily managed. They stand upon the floor, and are therefore not so hard to get at. The Condenser is equal to any in use—we believe superior to any now made. The lower end of the cylender being open, all dr.t from the fint is driven through the floor by the air from the gin-bruth. By the use of this Condenser the lint-room can be entirely done away with, saving many dollars in the construction of buildings, making the labor of handling the cotton before packing far easier, and loss and damage by fire is reduced to a minimum. The Feeder and Condenser will pay for themselves in one season. Every machine is fully warranted to do perfect work, and until the purchaser is fully satisfied with the machine we do not ask for payment. Should any machine prove in any way defective, we make the same good at our expense, upon notice being given to us. We give the names of gentlemen in this and adjoining Counties who have the Dariel Pratt Gins, Feeders and Condensers in use, and refer the public to them, believing that their recommendation of the machines will be more satisfactory any one desiring to purchase than the ordinary stereotyped form so common :—
